

Welcome back to the first part of the summer term!

This half-term is incredibly busy and exciting. As Year 6s are busy revising for SATs, our Year 5s are going to complete a project about Wales after they return from their residential visit.

Geography

After coming back from Wales, the Year 5s are going to be studying counties and cities of Wales and their identifying human and physical characteristics; including hills, mountains, coasts and rivers.

Skills taught will include 4- and 6-figure grid references, symbols and keys of maps. We will also research the importance of tourism in Wales and why people visit Wales.

Art

In art, Year 5s will be creating Welsh landscape paintings using a variety of painting techniques.

ICT

This term, we are studying Animation. We will be learning to create more advanced animations using different software packages.

Music

In music lessons on Tuesday afternoons the children will be learning and performing a variety of Welsh songs.

English

After returning from Wales, the Year 5s will be studying Harry Potter in guided reading and English. This will be the basis for this half term's writing.

Year 5
Summer 1

PSHE

We will be learning about the elements that make a good friendship and how to resolve friendship problems.

PE/Games

Athletics will be our main focus. We're looking forward to helping the children develop their techniques and skills, resulting in faster speeds and higher jumps.

Science

Within our study of life cycles and reproduction of plants and animals, children will be describing the differences in the life cycles of a mammal, an amphibian, an insect and a bird. They will also cover the life process of reproduction in some plants and animals.

Maths

Year 5 will start with place value, moving onto fractions, measure and time. They will also cover addition, subtraction, multiplication and division in calculations and within word problems.
